

# VICKERLUBE SOCK

## 46

Textiles

### DESCRIPTION

Mineral based needle lubricant for the lubrication of sock knitting machinery.

### APPLICATIONS

VICKERLUBE SOCK 46 can be applied by any method normally employed on sock knitting machines including circulatory oil systems, mist or spray systems or by manual oiling.

### APPLICATION DETAILS

VICKERLUBE SOCK 46 is designed to provide a high standard of lubrication of sock machine knitting elements and has very good stability and resistance to oxidation. The oil is self-emulsifiable and readily removed in scouring from cotton or synthetic fibres.

### PERFORMANCE DATA

- Readily scorable. Scouring under mildly alkaline conditions gives the best results on cotton.
- Expected to minimize swelling of elastomeric seals on knitting machinery.

### NOTES

**When introducing a new oil into a machine we recommend cleaning the original oil from the machine and oiler units as thoroughly as possible, to avoid the potential for any incompatibility problems.**

### TYPICAL CHARACTERISTICS AND PROPERTIES

VICKERLUBE SOCK 46	UNITS	TYPICAL RESULT
Colour		Fluid yellow oil
Viscosity @ 40°C	cSt	Approx. 46
Density @ 15°C	kg/l	Approx. 0.862
Cloud Point	°C	< 0
Setting Point	°C	< 0
Flash Point	°C	> 170
Ionic Character		Nonionic / Cationic
Emulsifiability		Emulsifies but not designed for application as emulsion
Shelf Life		7 years in original container stored out of direct sunlight

Vickers Oils, its officers, employees and agents assume no responsibility and shall not be liable to any person for any loss, damage or expense caused by reliance on the information or advice in this document or howsoever provided, unless that person has signed a contract with Vickers Oils for the provision of this information or advice and in that case responsibility or liability is exclusively on the terms and conditions set out in that contract. Products should only be used for the applications specified. The supplier cannot accept responsibility if they are used in any other application.
